HOW RECOVERY WORKS...

Your immune system is your last defense against disease, virus infection, post trauma, and even strenuous physical exercise. Medical studies show that at least 95% of all health problems can be related to immune system failure, due in part, to compromised nutrition. Problem is... you may be unknowingly affecting your body's immune function by not supplying it the nutritional requirements it needs to stay healthy! **RECOVERY EXTRA STRENGTH** is specifically designed to address your immune system requirements.
