HOW AMETROL WORKS...

AMETROL's main ingredients prevent carbohydrate absorption by blocking the enzymatic conversion of starches and sugars. AMETROL's substrates boost insulin sensitivity and excite insulin production to improve caloric utilization. Beneficial for people with diabetes and hypoglycemia. Works well with SYNEDREX. Recommended for use with the following diets: Atkins, Low-Carb, Carb Addict, Hi-Protein, etc.. Ultra powerful formula starts working at blocking carbs the 1st day you use it!
