### HOW THYRENE WORKS...

Recent studies suggest that dieting will trigger a body defense reaction preventing weight loss. This "starvation" defense slows metabolism, stops weight loss, and promotes more fat storage. **THYRENE** is a dietary supplement specifically developed to counteract the body's reactionary defense mechanisms that limit weight-loss goals. **THYRENE's** substrates enhance thyroid function, accelerates basal metabolic rate and triggers neurotransmitter production to promote an active healthy metabolism to make weight loss results come faster & easier than ever before!
