NUTRITION**

# Revolutionary Compounds Increase Strength 42%!

Illegal drug use in amateur and pro sports gone forever!

Metabolic Nutrition Inc. (MNI) of Fort Lauderdale, Florida, a 21 year old nutraceutical research company, has gained FDA and DOA approval for release of 2 revolutionary "never-seen-before" compounds in the Sport Supplement Industry. Seeing opportunity in a stagnant marketplace, with little innovation over the past 5 years to help improve athlete performance; and with all the publicity surrounding the crackdown of anabolic steroids and banned substances from pro to amateur sports...MNI has dedicated itself to the development of new innovative products which revolutionize the way sports and athletic performance is enhanced without the use of illegal substances.

After exhaustive efforts, extensive research and development cost, MNI is happy to announce the introduction of 2 revolutionary sports and athletic performance aids...CGP (Creatine-Glycerol-Phosphate) and TAG (Trans-Alanyl-Glutamine). Originally the intent with both of these products was to improve upon the side-effects and absorbability problems. After completing a successful re-engineering of these chemicals, the reported problems have been solved. In testing the new formulations, to the amazement of the technical staff, the compounds now exhibited explosive results never seen before with "regular" creatine and glutamine products...it could only mean that these were now a New-Breed of Super Compounds!

In a 4-week double-blind placebo test, TAG and CGP were compared to "regular" creatine & glutamine products as well as a control.

Test subjects were "experienced and trained" athletes. This ensured that muscle, endurance, and strength gains were a direct result of using TAG and CGP...not to new training or dieting implementations. At the conclusion of the study, the test results were overwhelmingly supportive of TAG and CGP outperforming the "regular-type" products by an exponentially large margin. Test subjects taking TAG and CGP documented up to a 42% increase in strength based on established exercise platforms related to multi-sport training. It is also important to note that testing for contraindications (side effects) was also conducted and no AER (Adverse Event Reports) were noted on the TAG & CGP group.

Metabolic Nutrition Inc. (MNI), after establishing the efficacy and safety of these exciting new compounds, has initiated full scale production of both TAG and CGP - to make them immediately available to athletes for the purpose of improving athletic performance without the need of illegal banned substances. Initial feedback from athletic departments and professional sports athletes has been very promising...with positive feedback of increased strength and endurance being reported within 48 hours of 1<sup>st</sup> use!

In an effort to reach as many athletes as possible, MNI has partnered with Europa Sports Products of Charlotte, NC in an exclusive contract for distribution of TAG and CGP nationally in the United States. Eric Hillman, CEO of Europa Sports Products says, "We're anxious to supporting Metabolic Nutrition and their high end quality products. This Manufacturer/Distributor partnership will bring our existing business relationship to the next level and allow Metabolic Nutrition to continue to focus on quality manufacturing and Europa Sports Products to focus on precision sales and distribution. This is a win/win opportunity for everyone and we look forward to the business and growth this dedicated partnership will bring to both companies." Jay Cohen, CEO of MNI, "Being the pinnacle authority in the Sports Performance category...we knew that Europa Sports Products was the only option to reach as many athletes as possible. It has already been established that athletes are willing to sacrifice everything to become the best...but now with the help of TAG and CGP...they don't have to put their health on the line to do so, nor break the law! We have proven it in clinical testing...and now with Europa Sports distribution, we will prove it on athletic fields across the country," concluded Mr. Cohen.

\*TAG and CGP are proprietary patent-pending formulations owned exclusively by Metabolic Nutrition Inc., Ft. Lauderdale, Florida.
